Dear Harold, 11/2/98

Enclosed you will find an ad which appeared in this past Sunday's New York Times Book Review section. Having read your expose of Hersh's book and given the fact that he gives a promotional blurb for this new book, I'm sure you can easily guess the conspiracy theory it weaves. It appears, as you accuartely predicted, that the Castro-kickback theory is going to become increasingly popular. I was also surprised (but not too much) that Posner gives it a favorable blurb. I thought he closed the case some years ago. But as we know, the man has no shame.

Hanh-Trang has a new job with the hospital -- home health. She visits and counsels some of the poorest of the poor in Spartanburg Co. This is full-time and entails a fair amount of travelling. I have been busy as usuual with school work. In another week, I plan to devote a couple class periods in my criminology course to JFK. I plan to show the video version of the Zapruder film which was released last Spring. I have been in touch with Dave about the book he is working on on the Zapruder film.

I hope you and Lillian are doing Ok and are able to enjoy some of the most beautiful and tranquil fall weather I can remember.

Best,

Gerry
